PROFESSIONAL SUMMARY

Area Project Manager and Biomedical Engineer with 13+ years of experience spanning hospital clinical engineering in Egypt and large-scale regional maintenance operations in Saudi Arabia. Currently leading medical maintenance for 8 hospitals and 101 primary healthcare centers in the Tabuk Health Cluster — 10,000+ medical devices and a team of 35+ engineers and technicians. Proven experience in JCI and CBAHI accreditation, technical specifications and tendering, vendor and service-contract management, and building digital tools (CMMS, data analysis) for data-driven maintenance. PMP certification in progress.

PROFESSIONAL EXPERIENCE

Area Project Manager — **Jun 2026 – Present**

First Gulf Company (FGC) – Tabuk Health Cluster, Saudi Arabia

- Lead medical maintenance operations across 8 hospitals and 101 primary healthcare centers, covering 10,000+ medical devices.
- Manage a multidisciplinary team of 35+ biomedical engineers and technicians across corrective, preventive (PPM) and calibration programs.
- Ensure compliance with cluster KPIs and the performance-based maintenance contract; report operational performance to cluster leadership.
- Drive digital transformation of maintenance management: in-house CMMS development and weekly reporting from work-order data.

Project Manager – General Administration of Medical Maintenance — **Oct 2022 – Jun 2026**

First Gulf Company (FGC) – Tabuk Health Cluster, Saudi Arabia

- Led a technical team of 3 engineers and 14 technicians, managing medical asset maintenance workflows and minimizing equipment downtime.
- Prepared primary healthcare centers for CBAHI accreditation surveys; formally recognized by the King Fahd Specialist Hospital sector for the readiness of 6 centers.
- Recognized by Intrazero for professional use of the iAssets CMMS and contribution to improving asset management (2025).

Mobile Teams Project Manager — **Aug 2018 – Sep 2022**

SRACO Company – Tabuk Region, Saudi Arabia

- Managed mobile maintenance teams serving 101 primary healthcare centers across the Tabuk region.
- Sustained critical equipment availability during the COVID-19 pandemic, supporting rapid readiness of respiratory and critical-care equipment.
- Reduced response times for corrective maintenance requests across a wide, geographically dispersed region.
- Coordinated with facility management to ensure equipment availability; recognized by the Ministry of Health – Tabuk on World Quality Day 2019.

Senior Biomedical & Clinical Engineer — **Sep 2017 – Jul 2018**

As-Salam International Hospital (JCI Accredited) – Cairo, Egypt

- Led the biomedical engineering team as acting Supervisor Engineer during absences.
- Prepared technical specifications and evaluated tenders for new medical equipment.
- Managed service contracts with authorized agents and monitored vendor performance.
- Controlled spare-parts inventory and resolved complex technical complaints with corrective actions.

Biomedical & Clinical Engineer Mar 2016 – Sep 2017

Elaraby Hospital (JCI Accredited) – Cairo, Egypt

- Contributed to JCI accreditation by preparing equipment documentation, maintenance records and risk assessments.
- Participated in equipping new departments and renovation projects, including acquisition planning and equipment upgrades.
- Developed preventive maintenance schedules and trained nursing staff and technicians on safe equipment use.

Maintenance Engineer Sep 2013 – Mar 2016

Al Waha Medical Service Company – Egypt

- Installed, calibrated and repaired medical equipment, specializing in hemodialysis systems and radiology/ICU equipment.
- Performed on-site troubleshooting and delivered end-user training at client hospitals.

KEY PROJECTS

Tabuk Medical CMMS (in development) Next.js, Supabase

Web-based CMMS built around the cluster's performance-based maintenance contract: asset registry, sites and departments, tickets and work orders, PPM and calibration, spare parts, KPI dashboards, and the monthly contract extract with automated penalty/deduction calculation.

AI-Driven Predictive Maintenance (data analysis phase) Data analysis, ML

Collecting and analyzing historical work-order data to identify failure patterns as the foundation for a fault-prediction model.

Hospital Devices Information System (HDIS) C#, SQL Server

Desktop application digitizing equipment inventory, maintenance tracking, technical validation reports and spare-parts stock.

SKILLS

Management: Regional operations, team leadership, KPI management, budgeting and planning, contract and vendor management, tendering and technical specifications

Technical: PPM and calibration, hemodialysis, radiology, ICU and laboratory equipment, medical gases, medical waste management

Quality & Accreditation: JCI, CBAHI

Digital: CMMS (iAssets), data analysis, C#, SQL Server, Next.js

EDUCATION & CREDENTIALS

- **B.Sc. Systems & Biomedical Engineering** – Cairo University, 2013
- **Saudi Council of Engineers** – Professional Accreditation, Biomedical Engineer
- **PMP® (Project Management Professional)** – in progress
- **Training:** Siemens and GE Healthcare equipment; hemodialysis, laboratory and calibration equipment; medical gases; medical waste management; information security awareness
